***Response to Arguments***

In response to Applicants remarks, the previous restriction requirement is withdrawn.

***Claim Rejections - 35 U.S.C. § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant is claiming in line 11 "wherein said the auto-correlation function of said N symbol" is unclear to Examiner as to exactly what Applicant is claiming.

3. Claims 2, 4, 8 and 11 recites the limitation "said the auto-correlation function of said N symbol" in lines 11 and 12 on page 17, lines 8 and 9 on page 18, lines 10 and 11 on page 20, lines 19-23 on page 21. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 U.S.C. § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2664

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kamerman et al.

Regarding claim 1, Kamerman discloses (Abstract, Figs. 4, 5, 6, cols. 3, 4, 6 & 8) a receiver, packets and associated training/data portions, multiple sequences connected serially.

*Allowable Subject Matter*

5. Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Regarding claim 2, the limitation "auto-correlation function of symbol sequence is in an impulse state" is absent from the art.

6. Claims 2, 4, 8 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Regarding claims 2, 4, 8 and 11, the limitation "auto-correlation function of symbol sequence is in an impulse state" is absent from the art.

7. Claims 3, 5-7, 9, 10 and 12 are allowed over prior art. Regarding claims 3, 7 and 10, the limitation "frequency-offset estimation means for estimating a frequency-offset based on a phase difference between two neighboring sequences of K sequences" is absent from the art. Claims 5, 6, 9 and 12 depend on claims 3, 7 and 10, therefore, claims 5, 6, 9 and 12 are allowed as well.
